Box-model, Float & Clear exercises

Exercise 1

- Create `exercise1.html` and `css/exercise1.css` files and link them.

- Add a navigation with 4 links.

- Add some margin, padding and border to the navigation elements.

- Make navigation elements occupy exactly 25% of the navigation.

- Add a section with an image (128x128px, e.g.: https://picsum.photos/128).

- Add a paragraph with some random text.

- Make the image apear floating on with the text.

- Add some margin so the text is not too close to the image.

- Do the same with an image floating on the right.

- Add 2 short paragraphs.

- Add another image floating on the left.

- Make the 2nd paragraph not to show on the right of the image.

Paragraph 2.

Paragraph 3.

Exercise 2

- Create `exercise2.html` and `css/exercise2.css` files and link them.
- Create the following layout:
  - The top part should occupy an entire row.
  - navigation and section should occupy 75% of the body and must share width with the aside.
    - Copy navigation from exercise 1.
  - An aside that has a list of 20 items (emmet => `ul>li*20{Item $}`).
    - Remove any margin or border.
    - Add some padding.
    - Set a background color.
    - It should occupy exactly 25% of the body.
  - Footer should occupy and entire row.
    - Add some copyleft text.
    - Add some color and styling.
